CURRICULUM VITAE
R. Muit

PERSONAL DATA

Name:	Roderik Muit
Date of birth:	27th April 1974
Citizenship:	Dutch
Marital status:	unmarried
Current position:	software developer / analyst; most recently websites / web applications (Drupal; php framework), also system administrator of own small scale ISP / web hoster
Address:	Plesmanlaan 50 II 3555 AP Utrecht Nederland
Telephone:	+31-20-664 05 65
Mobile:	+31-622 517 218
E-Mail:	rm@wyz.biz

PROFILE SUMMARY

Long time experience with working in international area
Good communicative skills
Able to work well independently as well in a team
Experience in managing smaller (software)projects (1-3 people) from specification to delivery
Experience in working simultaneously in different projects and different organizations

EDUCATION

1986-1992	VWO (Willem de Zwijger s,g, Papendrecht)
1992-1994	Technical University Delft (Netherlands), department of Electrical Engineering (no degree)

EMPLOYMENT

Jan 1995-Aug 1999	RIPE NCC, Amsterdam, Netherlands
Sep 1999-Mar 2004	Koster Engineering B.V., Delft, Netherlands
Oct 2008 – Feb 2009	VoiceHero Kft., Budapest, Hungary
May 2004-current	Wyz, Amsterdam, Netherlands (one man business registered with Chamber of Commerce under nr. 34.20.65.64)

EXPERIENCE

Programming languages

Basic / VB / VBA	17 years
Perl	4 years
PHP	2.5 years
Javascript & jQuery	0.5 years
Assembler Z80	5 years
UNIX Shell scripting (Bash)	8.5 years

Databases

ANSI SQL, PL/SQL	9.5 years
MySQL	1.5 years
PostgreSQL	1 year
Oracle	3 years
Sybase	2 years
MS SQL Server	1 year
MS Access. including VBA	8 years
ODBC, OLE DB	7 years

Development frameworks

Drupal (as user / building personal websites & contributing patches)	5.5 years
Drupal (as module coder)	1.5 years

Development environments

Sybase PowerDesigner 8-9.5	2 years
Crystal Reports	0.5 years
Microsoft Office (primarily Excel, including VBA)	8 years
Microsoft Visual Basic 6.0	8 years
Eclipse PHP Development Tools	0.5 years

Oses (general knowledge)

MS-DOS, Windows 9x, 2000, XP	12 years
Linux	9.5 years
BSD/OS (BSDi)	4 years

System administration

(BSD)UNIX	2 years
Debian GNU/Linux	12 years
Xen (virtual serverhosting)	0.5 years
Apache (web server)	5 years
Nginx (web server)	1 year
PHP, configuration etc.	1 year
Postfix (mail server - MTA)	5.5 years
Cyrus (POP/IMAP server)	3 years
Courier (POP/IMAP server)	1.5 years
Dovecot (POP/IMAP server)	0.5 years
Mailman (mailinglist server)	4 years
Sympa (mailinglist server)	2 years

Version control

Microsoft Visual Source Safe	2 years
Borland StarTeam (version control & bugtracking)	4 years
CVS	1.5 years
Bazaar	0.5 years

Miscellaneous

Project management (small scale)	1 year
Account management	3 years

WORK EXPERIENCE – SUMMARY

Jul 2004 – current:	Wyz -- www.wyz.biz; self employed software engineer / business analyst, 2004-2007 mainly developing database applications, mostly in financial industry
	2008-2010 mainly developing web (PHP/Drupal) applications; also small scale ISP
Oct 2008 – Feb 2009:	VoiceHero Ltd / VoiceHero Kft. -- www.voicehero.com; developing Drupal modules (PHP CMS) and helping build startup company in all appropriate ways
Sep 1999 – Mar 2004:	Koster Engineering – www.kosterengineering.nl; developing Microsoft Access & VB6 client applications for customers
Jan 1995 – Aug 1999	RIPE NCC – www.ripe.net; Perl programming, Unix system administration, customer relationship management

WORK EXPERIENCE – DETAILED

I – Drupal: Wyz / self employed

Jan 2010 – current for various small size companies
Conversion of existing web sites to Drupal and further automating/extending interactive possibilities.

Aug 2009 – current
Providing Xen virtual server hosting (Xen on Debian GNU/Linux) on own server (located at XS4ALL data center)

Aug 2009 – current for Qrios Webdiensten
Several smaller sized Drupal subprojects for Qrios clients
Responsibilities:
- Implementing custom module programming / theme development work according to rough specifications
- Communicating with Qrios about the exact implementation of things and integration in projects

II – Drupal: VoiceHero Kft.

Oct 2008 – Feb 2009
General help in developing plans for building a stably growing startup company

Oct 2008 – Dec 2008
Development of Drupal modules (batch image upload; integration for proprietary flash player for uploaded images; specific contest) for Drupal 5 e-comics website; talking to client about progress & deadlines

Oct 2008 – Nov 2008
Modifications on existing Drupal website of UN-related organisation; patching Drupal module for document handling

III – VBA/Data analyst: Wyz / self employed

Jun 2005 – Oct 2007 for Koster Engineering
Incidental development work on the KEPS code framework (see Aug 2002) and various applications for UBS Switzerland which are based on it or ported to it.
Location: working from home
Responsibilities:
- Ongoing development / porting work (in Visual Basic or Microsoft Access)

<u>Sep 2006 – Oct 2007 for Tommy Hilfiger Europe (Retail) (through Computer Futures)</u>
Further development and conversion of exlsting MS Access application for administering stores
(building prerequisites, budgets) in Europe
Responsibilities:
- Developing new MS Access applicatiion voor different type of stores having different data/needs from example of existing application
- Further developing existing application; creating new reports
- Converting existing application to consistent data model and MS SQL Server backend
- Rolling out new application versions over division
- Acting as point of contact for reporting application errors and new related needs for automation

<u>Sep 2006 – Jan 2007 for De Geestgronden, Bennebroek (via Michael Page Interim)</u>
Making adjustments in data-feed from office to headquarters (consisting of MS Access tables / macros / VBA)
Adjusting VBA macros for reports / 'mail-merge' in existing MS Office application

<u>Aug 2006 – Sep 2007 for ABN AMRO (Asset Securitisation) (via Michael Page Interim)</u>
Development of application for reconciling financial mutations in two systems (CMS and 'Rumba')
Responsibilities:
- Assessing specifications on practicality / proposing alternatives where necessary
- Developing reconciliation rules (SQL queries) and application (MS Access, reports in MS Excel), including possibility for 'manual' reconciliation where necessary
- Acting as point of contact for questions and new needs
- Transferring application knowledge to ABN AMRO internal support; acting as 'second line' for related questions from support dept

<u>Feb 2005 – Sep 2006 for ABN AMRO (WCS Product Control) (through Michael Page Interim)</u>
Analysis of various business processes (usually interfaces between financial systems); development of tools for data manipulation, in Microsoft Access or Excel.
Location: ABN AMRO (head office Amsterdam Buitenveldert)
Team: independently working with anyone in the division having a need for automation
Responsibilities:
- Gathering user requirements
- Development of solutions in Microsoft Access or Excel
- Implementation, guiding users in using the tools, implementing user feedback / changing requirements over time
- When the need became apparent for a full time function doing this at WCS Product Control, carrying over the function + developed tools to my replacement, and gradually stopping work

<u>Mar 2005 – Aug 2005 for ABN AMRO (WCS Product Control) (through Michael Page Interim)</u>
Development of 'workflow' application which automates sending out of reports to clients by e-mail and keeping automated statistics of delivery time & approval of reports.
Location: ABN AMRO (head office Amsterdam Buitenveldert)
Team: - (independent)
Responsibilities:
- Gathering user requirements
- Software development (MS Access 97/XP VBA+DAO, based on self written common framework; reports in MS Excel)
- Implementation at various locations within Product Control, guiding users in using the tool, implementing user feedback / extra requirements over time
- Writing user manual
- Doing demos for anyone with a possible need for the application, guiding them in seeing whether this solution is beneficial to them

<u>Jul 2004 – Jul 2006 for ABN AMRO (WCS Product Control) (through Michael Page Interim)</u>
(Re)implementation of application automating Macro Cashflow Hedging according to IAS39 standards for swap portfolios. (which is a standardised financial process)
Location: ABN AMRO (head office Amsterdam Buitenveldert)
Team: me as single developer, 3-4 people as sources of requirements / end users
Responsibilities:

- Gathering (ever changing) specifications of process and reworking them into technical specifications for the application
- Software development (8 months with implementation of various phases) in MS Access 97/XP VBA+DAO, based on self written common framework; reports in MS Excel)
- Co analysis / testing of correctness of the implementation
- Writing user manual and technical documentation
- Extending application to match ever more sophisticated requirements

IV – VB/VBA/Data analyst: Employer Koster Engineering B.V.
N.B.:
- end date 'Mar 2004*' means 'date of leave; work continued with employer'
- except projects marked with (**), this is no project work at the customer site. All work has been carried out in contact with the customer, and Dutch customers I have visited regularly for planning/implementation/support, but the development work has been done primarily at Koster Engineering offices.

<u>Sep 2003 – Mar 2004* at BP Oil Netherlands</u>
Development/implementation of application for tracking/reporting inventory & movements of Oil in tanks
Team: - (independent)
Responsibilities:

- (Re)analysis of business requirements, technical specification of application
- Software development (MS Access 2000 VBA+ADO, based on self written common framework; reports in MS Excel)
- Support
- Extending application according to changing business logic

<u>May 2001 – Mar 2004* at PwC Shared Services (now IBM Shared Services)</u>
Development / support of interfaces (in the form of various MS Access applications) for accounting / financial reporting of BP
Location: Benelux
Team: 3 people
Responsibilities:

- Code Redesign: MS Access 97 macros -> MS Access 2000 VBA+ADO (implemented on self written common framework)
- Support
- Extending application according to changing business logic

<u>Apr 2003 – Mar 2004* at Koster Engineering B.V.</u>
Developing new application for portfolio maintenance of all UBS firms/subsidiaries
Customer: Union Bank of Switzerland AG, Switzerland
Team: 3 people
Responsibilities in the team:

- Analysis of business requirements
- Software development (Visual Basic, based on self-written common framework)
- Incidental management of development / coordinating work of other developers

Aug 2002 – Mar 2004* at Koster Engineering B.V.
Developing common framework for database applications, to be able to base future projects on (later dubbed KEPS)
Team: 3 people
Responsibilities in the team:
- Code analysis
- Reimplementation/separation between code in common framework and (possibilities for) interchangeable per-customer specific code

Jul 2001 – Mar 2004* at Koster Engineering B.V.
Developing new application for customer & task/workflow maintenance
Customer: SIS (formerly SegaInterSettle), Switzerland
Team: 2-5 people
Responsibilities in the team:
- Rewriting application Microsoft Access -> Visual Basic
- Analysis of further business requirements
- Developing extensions to application (in Oracle data model and Visual Basic application) – a.o. integrated email client, various synchronisation modules with other systems
- Incidental management of development / coordinating work of other developers

Jun 2000 at Union Bank of Switzerland AG, Switzerland (**)
Development of reporting framework for existing application
Location: Switzerland
Team: 3 people
Responsibilities in the team:
- Analysis of business requirements
- Software development (Microsoft Access + Excel VBA)

Jun 2000 – end 2002 at Koster Engineering B.V.
Development of application for customer & task/workflow maintenance
Customer: SQS, Switzerland
Team: 2 people
Responsibilities in the team:
- Software development (Microsoft Access 8.0 frontend; Sybase backend)

Sep 2000 – Jan 2001 at Koster Enginering B.V.
Specification and development of synchronisation between different pools of customer data at different locations
Customer: SunStar Hotels, Switzerland
Team: - (independent)
Responsibilities:
- Implementing central application for customer maintenance (Microsoft Access VBA)
- Data analysis
- Development & implementation of synchronisation module between central application and local data stores

Feb 2000 – Mar 2004* at BP Oil Netherlands
Development and support of reports for tax & excise, using report interface 'LISA'
Locations: Benelux
Team: 2 people
Responsibilities in the team:
- Development reports
- User support
- Tracking wrong data / business logic, in cases of incomplete data on reports

Sep 1999 – Dec 1999 at BP Oil Netherlands
Conversion of stock maintenance application ('Atlas')
Team: - (independent)
Responsibilities:
- Interface Redesign
- Code Redesign: MS Access 2.0 macros -> MS Access 97 VBA
- Verifying Business Logic
- Support (1999 – Mar 2004*)

V – Perl / Sysadmin: Employer RIPE NCC

mid 1997 – aug 1999 at RIPE NCC
Implementation & maintenance of various Perl applications used for internal business logic
Team: 1-4 people
Responsibilities:
- Document new functionality requirements; implement them in Perl

General design of applications:
> Mostly working with 'data backend' consisting of text files (custom format) containing customer and product data, which were indexed and integrity checked by Perl scripts.
> Most tools are Perl scripts run from the UNIX shell, with general functionality separated out into modules; some tools are CGI-scripts.
> Occasionally used DBI / DBM for data storage.
> a.o.:
> - 'ticketing system' for incoming e-mail; automatic e-mail reply system;
> - system for generating invoices; sending automatic payment reminders; budget calculation
> - 'stock maintenance' (being blocks of unallocated IP addresses)

mid 1995 – mid 1998 at RIPE NCC
Implementation & maintenance of new customer/client administration
Team: - (independent)
Responsibilities:
- Maintenance of administration, support for new customers, information point for regulations RIPE NCC
- Continuously adjusting used application for members database (Perl) according to new requirements of other RIPE NCC departments

Projects / smaller tools worked on in own time

Jul 2004 - current
System administration (Linux) of internet server in co-ownership with friends / as a board member of a non-profit foundation, hosting websites (with databases & everything a website needs) + e-mail for interested parties. (current foundation website: www.stichtingbcco.com)

end 2003 – current
Setting up community website based on Drupal
Patching Drupal code; where possible, documenting patches & bugs and communicating back to Drupal (module) maintainers. (http://drupal.org/user/8841/track)
